Magento 1.4.x - 1.8.x plug-in

Version 4.1.X

Table of Content

Installation

The installation of the Sisow plug-in can be done in two different ways. You can install the plug-in through Magento Connect, it can be found on the following page (http://www.magentocommerce.com/magento-connect/sisow.html).

Besides this the plug-in can be uploaded with a FTP program to your Magento installation. When you do this, don't forget to clear the cache of Magento.

When the old Assure Pay plug-in is installed don't delete the plug-in only deactivate it. When you delete the old plug-in, earlier orders can't be opened anymore.

Configuration

When you are in the administrator environment of Magento go to 'System'→ 'Configuration'. Here you will find the menu option 'Sisow' (under Sales).

The following options appears:

Sisow

| Sisow General Settings |
| Sisow iDEAL |
| Sisow MisterCash |
| Sisow SofortBanking |
| Sisow CreditCard |
| Sisow OverBoeking |
| Sisow PayPal |
| Sisow Klarna Factuur |
| Sisow Klarna Account |
| Sisow Webshop Giftcard |
| Sisow Ebill |

The first thing we need to configure are the 'Sisow General Settings'. The following menu options are avaible.

Sisow General Settings

Merchant ID		[STORE VIEW]
	▲ The Merchant ID form Sisow. You can find this in your Sisow profile.	
Merchant Key		[STORE VIEW]
	▲ The Merchant Key form Sisow. You can find this in your Sisow profile.	
Auto invoice	Yes and send mail	[STORE VIEW]
Order status 'success'	Processing	[STORE VIEW]
Order status 'cancelled'	Canceled	[STORE VIEW]
Order status 'expired'	Canceled	[STORE VIEW]
Order status 'failure'	Canceled	[STORE VIEW]
Order status 'reservation'	On Hold	[STORE VIEW]
	▲ Only for Klarna Invoice and Klarna Account.	

- Merchant ID: The Merchant ID as provided in your Sisow profile under the option 'Mijn Profiel';
- Merchant Key: The Merchant Key as provided in your Sisow profile under the option 'Mijn Profiel';

- Auto invoice: after a succesfull transaction the plug-in can generate the Magento Invoice and send it to the customer;
- Order status 'success': the order status after a successful transaction, default Processing;
- Order status 'cancelled': the order status after a cancelled transaction, default Cancelled;
- Order status 'expired': the order status after an expired transaction, default Cancelled;
- Order status 'failure': the order status after an failed transaction, default Cancelled;
- Order status 'reservation: the order status after an successful Klarna transaction, default On Hold.

Beside the General setting each payment method has its own configuration options:

Sisow iDEAL		
Enabled	Yes	[WEBSITE]
Title	iDEAL	[WEBSITE]
Prefix		[STORE VIEW]
Testmode	Yes	[WEBSITE]
Sort order		[STORE VIEW]
Auto invoice	Use General settings	[STORE VIEW]
Minimum Order Total		[STORE VIEW]
Maximum Order Total		[STORE VIEW]
Payment from Applicable Countries	Specific Countries	[STORE VIEW]
Payment from Specific Country	Mongolia Montenegro Montserrat Morocco Mozambique Myanmar [Burma] Namibia Nauru Nepal Netherlands	[STORE VIEW]
Payment fee	-5;5 ▲ Payment fee, positive is amount, negative is percentage or make a comination (eg 1;-3)	[STORE VIEW]

Including/Excluding Tax	No ▲ Is the entered payment fee value including or exluding tax	[STORE VIEW]
Payment fee label	test ▲ Payment fee label to show	[STORE VIEW]

- Enabled: enable or disable the payment method;
- Titel: the name of the payment method;
- Prefix: the text in front of the order number, example 'Order', the description is: 'Order 1234';
- Testmode: test the transactions with the Sisow simulator;
- Sort order: the sort order of the payment methods;

- Auto invoice: after a succesfull transaction the plug-in can generate the Magento Invoice and send it to the customer;
- Minimum Order Total: the minimum order total, when the order total is lower the payment method won't appear;
- Maximum Order Total: the minimum order total, when the order total is lower the payment method won't appear;
- Payment from Applicable Countries: the payment options appears at all countries or specific countries;
- Payment from Specific Country: when the option 'Payment from Applicable Countries' has the value 'Specific Countries' the countries can be selected here;
- Payment fee: the payment fee which is calculated for the payment method. If a negativ number is entered the fee will be counted as a percentual value, when entered a postive number it will be counted as a fixed value. You can enter both by separting it with a ';';
- Payment fee tax class: The tax class to use to calculate the payment fee tax;
- Including/Excluding Tax: is the entered payment fee value including or excluding tax;
- Payment fee label: text that will be used for the payment fee in the order totals.

The options abrove are avaible for every payment method from Sisow. There is only one exception, that's the payment fee. The payment fee isn't avaible on Klarna Account, Klarna invoice accepts only a fixed payment fee.

For the payment method Sisow OverBoeking there are two extra options avaible:

Daarnaast zijn er voor Sisow Overboeking nog extra opties:
- Days overboeking is valid: the number of days that the overboeking can be paid, after this period the overbooking gets the status Cancelled;
- Include payment link: add a payment link in the email.

Klarna Invoice en Klarna Account

When you receive a successful transaction with Klarna, this transaction will have the status Reservation within your Sisow account.

There are two ways of making this transaction a Success.

In Magento it is possible to convert a 'Reservation' into a Success transaction. This can easily be done by creating the Magento invoice. Once this happens, a signal will be sent to Sisow and Klarna to generate the invoice. However the 'auto invoice' option should be enabled in the configuration, if it is disabled the Klarna invoice won't be generated.

The Klarna Invoice can also be generated from the Sisow portal. When you are in the transactions screen you can search the Klarna transaction. When you select the Klarna transactions you get a block with the Klarna information. In this block you have also the following two buttons:

Maak factuur   Annuleer reservering

As soon as you click on "Maak factuur" there will be send a signal to Klarna to generate the invoice. The invoice can be downloaded from the Sisow portal or the Klarna portal. When you download the invoice you can send it by mail to your customer.

When you want to cancell the transaction you can click on "Annuleer reservering".

Sisow Ebill

Sisow Ebill can be activated on the exact same way as any other payment method from Sisow. The only difference with the other methods is that it isn't visible in the checkout process. Sisow Ebill can be used as a payment method for back orders. As soon you enter an order through the administration section of Magento and choose for Sisow Ebill, you customer receives an Ebill in his/her mail.

As soon the Ebill is paid the order state will change in Magento to "Success".

The following configuration options are available:

- Enabled: enable or disable the payment method;
- Titel: the name of the payment method;
- Prefix: the text in front of the order number, example 'Order', the description is: 'Order 1234';
- Testmode: test the transactions with the Sisow simulator;
- Auto invoice: after a succesfull transaction the plug-in can generate the Magento Invoice and send it to the customer;

Sisow Refund

It is possible to do a (partial) refund with when the order is paid with iDEAL. This function is connected to the Magento Credit function.

When you select an Invoice from a specific order which is paid with iDEAL you can choose for an online or offline refund. When you select the online refund there will be send a signal to Sisow to do a (partial) refund. If you choose for an offline refund nothing will be refunded through Sisow.

Magento 1.5.x

From Magento 1.5 an above only order statuses that are connected to the state 'New' and 'Processing' will be displayed in the drop down menu 'Order status ….' in the payment method configuration.

This order statuses can be configured in the menu option 'System'→'Order statuses'. In this menu new order states can be generated or existing edited.

Personalize payment methods

When you want to use SofortBanking Sisow has to enable this payment method. When we enable this payment method we will add the name and address details to Sofort. This name and address details will be show when a customer pays with Sofort.

Beside that you can upload some logo's to personalize the payment methods Ebill, overboeking and PayPal. In you Sisow portal you can find the menu option 'Upload', in this screen you can upload the following logos:

- Header logo: this logo will be display as header of the overboeking and Ebill e-mail;
- PayPal header logo: this logo will be displayed in the PayPal screen. When no logo is uploaded your company name will be showed.

Sisow portal

In your Sisow account the following fields can be ignored. This options will be controlled by the Sisow plug-in:

- Vaste Omschrijving
- Vaste Omschrijving ALTIJD gebruiken
- returnURL
- cancelURL
- callbackURL
- logo bankkeuze
